The small box on the left has the AM year 4105 followed by 8 letters representing the days of the week. Below the AM date is the Gregorian date 59 AD. Below that is a series of numbers taken from Chart #3 for the year 4105. The large box to the right in blue contains the numbers representing the Sabbaths for that year. The red numbers are the Sabbaths for the HCC. The black numbers are the Sabbaths in Gregorian days. Chart #6, page 3 has the year ending with a difference of 21 days. The SC is now 21 days advanced at the start of 4105 AM. The year 4105 has 354 days. This is found on Chart #5, page 2, cycle #9, top line. This shows the first day of the seventh month, Tisri to be a Thursday, the 4th of October. The SC is 365 days long. The difference between the SC and the HCC will be 21 minus 11. 21 minus 11 equals 10 days at the end of the year. The bottom line of the right hand box has a red 1 over the blue 11, which shows this difference. Chart #5, page 2, cycle #9 shows the Gregorian date for the 1st of Tisri to be Thursday, the 4th of Oct. Note: 60AD is a Gregorian leap year.
